New Splendour and Thrilling Floor Design

Company Foyer Innovatively and Creatively Designed: StoFloor Comfort BF 700 in Focus

The innovative **StoFloor Comfort BF 700** system was applied creatively and impressively in the refurbished entrance area of KLAUS in Augsburg, Germany. In the spirit of his own profession, customers and visitors are now greeted by a special concrete appearance on the floor and in the stairwell.

The **StoFloor Comfort BF 700** system, consisting of the floor paint StoCryl BF 700 and StoCryl BF 750 sealing coat, offered the perfect solution to realise the design wish - an emulated concrete surface appearance. The result was a high-quality, creative and visually highly appealing floor structure: Following the primer, the floor paint was filled with StoQuarz RF 1:08 and applied with a spatula. The attractive marbling appearance of the floor coating was created with the same product. For this, StoCryl BF 700 was diluted and applied by roller and wash finish. The special concrete look that emphasises the structure was created by using two colour shades of grey, StoColor 37102 and RAL 7005.

StoCryl BF 700: Low emissions, rich in possibilities

Maintaining health and creating a feel-good atmosphere - in all areas of life. This goal has driven StoCretec for more than 20 years. With a lot of passion and experience, we develop functional floor coatings that create a positive, load-free indoor climate. A healthy environment for people and animals. The acrylate meets the high requirements for sustainable construction according to German Sustainable Building Council (DGNB) and LEED. At the same time, StoCryl BF 700 Metallic inspires with creativity and individuality. Its numerous design options make your floor coating unmistakable. In addition, StoCryl BF 700 is produced in a CO²-neutral manner.

StoFloor Comfort BF 700 - creativity and individuality - numerous design options

The StoCryl BF 700 floor paints in the system are available in six variants that offer ideal solutions for every application.

The "Basic" version is abrasion-resistant, easy- to-use and impresses with its good concealing power. It is the ideal coating for basements and hobby rooms.

The "Easy Clean" version is perfect wherever cleaning has to be quick and easy, such as in sales or exhibition rooms.

The "Safe" version of StoCryl BF 700 is suitable for slip resistance, for example on stairs or in laundry and drying rooms.

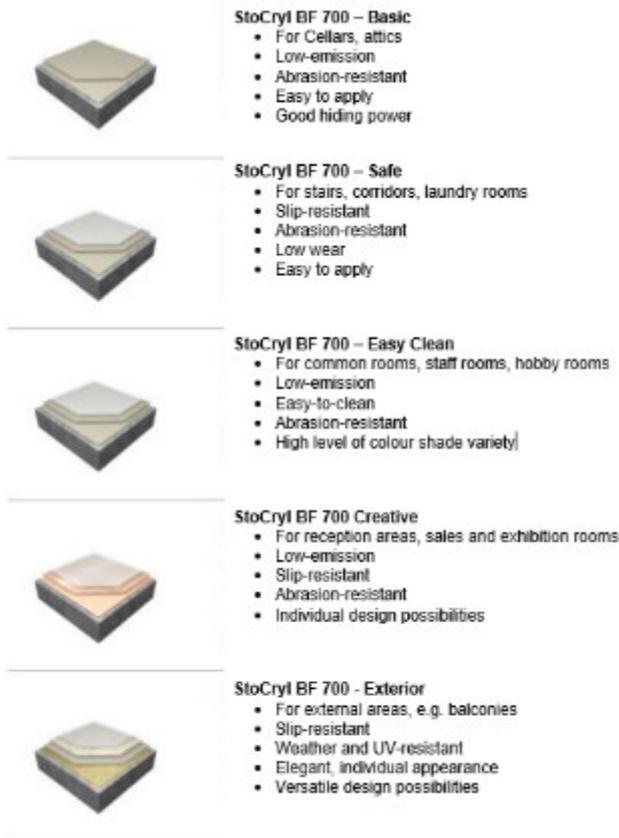

With "Creative", StoCretec fulfils artistic wishes and opens great freedom when it comes to floor design. This version of the coating is ideal for sales areas or exhibitions.

StoCretec also has a solution for outdoor areas such as balconies:

The "Exterior" version of StoCryl BF 700 is weather- and UV-resistant, slip-resistant and visually particularly inviting.

StoFloor Comfort BF 700 System
