Like the salt in the soup: Visually high-quality seamless floor coating for Café Salt in Mariager

Anyone interested in learning about salt mining and salt production should visit the Mariager Salt Centre in northern Jutland, Denmark. Located right next to Mariager's small harbour, the museum serves as a tourist attraction, bringing Danish and international visitors all the ins and outs of this topic. "Cool science and delicious products" is the museum's motto. That's why Mariager Salt is also used in the dishes at the adjoining Café Salt.

The café was refurbished with a new floor for the approximately 250 square metres café sales area with our low-emission* system **StoFloor Comfort Elastic BB 100**.

The elastic polyurethane resin system reduces the sound of footfall, offers a high level of walking comfort, and is durable. StoFloor Comfort Elastic BB 100 is low-emission*, durable, and, thanks to its seamless surface, easy to clean. These properties made it the optimal solution for this highly frequented public area. Another advantage of our StoCretec coating system is the individual, project-specific design options offered by its wide range of colour shades. With the sealing coat, the floor achieved a high-quality matt surface with good UV-resistance. Further, the system's priming coat is also resistant to rearward exposure to moisture.

The refurbished Café Salt is ready for its customers after a stroll in the neighbouring Centre.

Properties of **StoFloor Comfort Elastic BB 100**

- Viscoplastic StoCretec PUR floor coating build-up
- For sales and exhibition rooms, and for recreational and social rooms
- Seamless surface of a high visual quality
- Reduces the sound of footfall
- Crack-bridging
- Limited combustibility system build-up

- In accordance with EN 1504-2 and EN 13813
- Tested in accordance with the Committee for Health-related Evaluation of Building Products (German AgBB)*
- Tested system build-up with voluntary external monitoring
- Large number of long-term references
- Suitable for castor chairs (EN 425:19914 / elastic coverings)
- Individual, project-specific colour design possible
- Colour spectrum: RAL colour fan K 5, NCS

Who & What

Project:	Café restaurant
Investor:	Mariager Saltcenter, Mariager, DK
Applicator:	Areo A/S, Gjern, DK
Realisation:	3/2025
StoCretec competence:	StoFloor Comfort Elastic BB 100
	Primer StoPox GH 205
	Levelling coat StoPox GH 205
	Coating StoPur BB 100
	Sealing coat StoPur WV 205 transparent
