## StoColl Mineral HP

**Mineral bonding mortar for timber and board materials, solid timber, and bitumen**

For product description see Technical Data Sheet (if available)

### Information for building certifications in accordance with DGNB

**Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2018)**

no. 2: coatings mainly on mineral substrates in interiors (decorative paints, primers, decorative fillers): meet quality level 4 - solvent-free and plasticiser-free (in accordance with VdL guideline 01) or DE-UZ 102, no. 5: coating materials for mineral surfaces in exterior areas: meets quality level 4 - VOC content < 40 g/l (in accordance with Directive 2004/42/CE)

**Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2023)**

No. 2: coatings mainly on mineral substrates in interiors (decorative paints, primers, decorative fillers, as well as deep-acting primers, floor coatings without any special resistance requirements, concrete lasures): meets quality level 4 – solvent-free, plasticiser-free, and preservative-free (in accordance with VdL guideline 01) or equivalence with DE-UZ 102 in relation to the VOC/SVOC content and preservatives  
no. 5: coating materials for mineral surfaces in exterior areas: meets quality level 4 – VOC content < 40 g/l (in accordance with Directive 2004/42/CE); without film protection

**Product-specific LCA values (ENV 1.1 and ENV 2.1)**

in accordance with EPD

**Product-specific life cycle (ECO1.1)**

> 50 years if applied in interiors (in accordance with BNB),  
40 years in exterior application (in accordance with BNB)

**Impact on acoustic comfort (SOC1.3)**

not assessed

**Cleaning instructions (PRO1.5 and TEC1.5)**

see Technical Data Sheet

**Easy to recycle building material selection (TEC1.6)**

can be reworked

### Information for building certifications in accordance with LEED

**VOC content (EQ Credit: Low-emitting materials)**

0 g/l (without water) calculated according to the SCAQMD METHOD 304-91 (5.1)

## StoColl Mineral HP

### Environmental Product Declaration (EPD)

EPD-DBC-20220217-IBF1-EN

### GISCODE (in accordance with GISBAU)

ZP1

### Safety Data Sheet (SDS)

available

### Technical Data Sheet (TDS)

available

### Product ingredients

#### Composition

cement  
polymer powder  
mineral extenders  
fibre fillers  
Thickener  
Hydrophobic agents  
chromate reducer

#### Organic component (in accordance with natureplus, baubook)

> 5 %

#### Hazardous substances (in accordance with EU regulations)

See Safety Data Sheet (section 3)

#### CMR substances (VOC)

cannot be determined (limit of quantification: 1 mg/kg)  
(in accordance with DIN EN ISO 17895)

#### VOC content (in accordance with Directive 2004/42/CE)

not subject to the guideline

#### Plasticiser

plasticiser-free (materials in accordance with VdL guideline 01), (after formulation evaluation)

#### Free formaldehyde

not present (after formulation evaluation)

#### Biocide(s), active substance(s) for protection of the coating (in accordance with Regulation (EU) No 528/2012)

not present

# Sustainability Data Sheet

## StoColl Mineral HP

### UN Global Compact - membership

Sto is a member of the UN Global Compact and is committed to upholding ten universally acknowledged principles taken from the areas of human rights, labour standards, environmental protection, and anti-corruption. For further information please visit: [www.unglobalcompact.org](http://www.unglobalcompact.org)

### ILO fundamental conventions

Sto has committed itself to adhering to the ILO fundamental conventions at all of its locations.

### Quality management, environmental management, energy management

Production location certified in accordance with DIN EN 9001, DIN EN 14001, and DIN EN 50001.

### Supplier code of conduct

The Sto Supplier Code of Conduct is based on the principles of the UN Global Compact and the Sto Guiding Principles. Suppliers must adhere to these and are continuously evaluated.

This document aims to help you better assess the sustainability of our products. We consider sustainability to be a complex process that involves bringing together economic, ecological, and social criteria in order to satisfy the needs of current and future generations. Our products aim to contribute to this, while also meeting the requirements placed on them with respect to well-being, quality, and functionality. We regard sustainability as a process of continuous improvement, not one with an end result. With this in mind, we have defined the following core statements for our products:

1. Sto products make a contribution to key aspects of sustainability: e.g. climate protection, building, energy, and resource efficiency, protection and durability, health, and well-being.
2. All of the raw materials used in Sto products fulfil the functions for their application and are optimised with respect to their impact on the environment - based on the latest technology.
3. Sto products are produced in an energy and resource-efficient manner; renewable raw materials are used when appropriate and acceptable from an ecological, economical, and social perspective.
4. Sto evaluates and promotes the potential to dispose of, reuse, and recycle its products, taking technological and economical feasibility into account.

It is not just down to us to determine how the sustainability of our products is interpreted and evaluated - your opinions and decisions also play a role. The information listed here, which has the environment and health as its main focus, aims to assist you in this regard.

The information and data contained in this sustainability data sheet is based on our knowledge and experience. The publication of a new sustainability data sheet invalidates all previous versions. Please observe the information in the Technical Data Sheet and Safety Data Sheet. The latest version is available on the Internet.
