## StoPremiumlack Gloss AF

**Solvent-containing, PU reinforced, finishing lacquer for high-quality lacquer finishes on wood and metal, gloss**

For product description see Technical Data Sheet (if available)

### Information for building certifications in accordance with DGNB

**Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2018)**

No. 1: coatings on non-mineral substrates: meets quality level 1 - volatile organic compound content < 300 g/l cat. D (in accordance with Directive 2004/42/EG)

**Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2023)**

No. 1: coatings on non-mineral substrates: meets quality level 1 - volatile organic compound content < 300 g/l cat. D (in accordance with Directive 2004/42/EG)

**Product-specific LCA values (ENV 1.1 and ENV 2.1)**

not collected

**Product-specific life cycle (ECO1.1)**

18 years in interior application (in accordance with BNB), 8 years in exterior application (in accordance with BNB)

**Impact on acoustic comfort (SOC1.3)**

not assessed

**Cleaning instructions (PRO1.5 and TEC1.5)**

see Technical Data Sheet

**Easy to recycle building material selection (TEC1.6)**

can be reworked

### Information for building certifications in accordance with LEED

**VOC content (EQ Credit: Low-emitting materials)**

see Safety Data Sheet (section 15)  
Not met in accordance with LEED v.4

**VOC and SVOC emissions (EQ Credit: Low-emitting materials)**

not collected  
not relevant for use in exterior areas

**Formaldehyde emissions**

not collected  
not relevant for use in exterior areas

**Recyclable percentage (post-consumer recycled content) (MR Credit: Sourcing of raw materials)**

0 %

**Recyclable percentage (pre-consumer recycled**

0 %

## StoPremiumlack Gloss AF

### Implementation of the Federal Immission Control Act)

SVHC in accordance with the chemicals regulation REACH (EG/1907/2006), notes XIV

not present

### Emissions, CO2 balance sheet

Carbon dioxide value (manufacturing A1-A3) (cradle-to-gate)

not determined

Carbon dioxide value (life cycle A1-D)

not determined

Semi-volatile organic compounds SVOCs

not assessed

### Disposal, re-use, recycling

Disposal of residue

can be fed to a collection system for material recycling see Safety Data Sheet (section 13)

Disposal of dismantled building material

can be reworked

Packaging, pails, films

The return of used packaging and its correct recycling is organised and certified in accordance with the statutory requirements with a regional disposal company.

### Sto corporate responsibility

Guiding principles, management of the company

Sto's vision is to be the technology leader in the sustainable design of living space tailored to human needs. Worldwide. For further information please visit: [www.sto.com](http://www.sto.com)

## StoPremiumlack Gloss AF

### Quality management, environmental management, energy management

Production location certified in accordance with DIN EN 9001, DIN EN 14001, and DIN EN 50001.

### Supplier code of conduct

The Sto Supplier Code of Conduct is based on the principles of the UN Global Compact and the Sto Guiding Principles. Suppliers must adhere to these and are continuously evaluated.

This document aims to help you better assess the sustainability of our products. We consider sustainability to be a complex process that involves bringing together economic, ecological, and social criteria in order to satisfy the needs of current and future generations. Our products aim to contribute to this, while also meeting the requirements placed on them with respect to well-being, quality, and functionality. We regard sustainability as a process of continuous improvement, not one with an end result. With this in mind, we have defined the following core statements for our products:

1. Sto products make a contribution to key aspects of sustainability: e.g. climate protection, building, energy, and resource efficiency, protection and durability, health, and well-being.
2. All of the raw materials used in Sto products fulfil the functions for their application and are optimised with respect to their impact on the environment - based on the latest technology.
3. Sto products are produced in an energy and resource-efficient manner; renewable raw materials are used when appropriate and acceptable from an ecological, economical, and social perspective.
4. Sto evaluates and promotes the potential to dispose of, reuse, and recycle its products, taking technological and economical feasibility into account.

It is not just down to us to determine how the sustainability of our products is interpreted and evaluated - your opinions and decisions also play a role. The information listed here, which has the environment and health as its main focus, aims to assist you in this regard.

The information and data contained in this sustainability data sheet is based on our knowledge and experience. The publication of a new sustainability data sheet invalidates all previous versions. Please observe the information in the Technical Data Sheet and Safety Data Sheet. The latest version is available on the Internet.
