

Sustainability Data Sheet

StoTap Evo

Cellulose-based nonwoven, white pigmentation

For product description see Technical Data Sheet (if available)

Information for building certifications in accordance with DGNB

Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2018)

No. 43: building products with flame-retardant properties (products): meets quality level 4 - chlorinated paraffins < 0.1 %, polybrominated biphenyls < 0.1 %, polybrominated diphenyl ethers < 0.1 %, and substances of very high concern ≤ 0.1 % (in accordance with the persistent organic pollutants regulation and substances of very high concern of the REACH candidate list as well as long-chain chlorinated paraffins

Quality level (ENV1.2, in accordance with the criteria matrix, DGNB System Version 2023)

No. 43: building products with flame-retardant properties (products) – a) mains utilities insulants: meets quality level 4 – chlorinated paraffins (SCCPs + MCCPs + LCCPs) < 0.1 %, polybrominated biphenyls < 0.1 %, polybrominated diphenyl ethers < 0.1 %, substances of very high concern < 0.1 %, and antimony trioxide <<> 0.1 %

Product-specific LCA values (ENV 1.1 and ENV 2.1)

not collected

Product-specific life cycle (ECO1.1)

> 50 years if applied in interiors (in accordance with BNB)

Impact on acoustic comfort (SOC1.3)

not assessed

Cleaning instructions (PRO1.5 and TEC1.5)

see Technical Data Sheet

Easy to recycle building material selection (TEC1.6)

can be reworked

Information for building certifications in accordance with LEED

VOC content (EQ Credit: Low-emitting materials)

not present
Met in accordance with LEED v.4

VOC and SVOC emissions (EQ Credit: Low-emitting materials)

TÜV SÜD
Met in accordance with LEED v.4

Sustainability Data Sheet

StoTap Evo

Formaldehyde emissions	TÜV SÜD Met in accordance with LEED v.4
Recyclable percentage (post-consumer recycled content) (MR Credit: Sourcing of raw materials)	0 %
Recyclable percentage (pre-consumer recycled content) (MR Credit: Sourcing of raw materials)	0 %
Renewable raw materials (bio-based materials) (MR Credit: Sourcing of raw materials)	70 %
Information for building certifications in accordance with BREEAM	
Formaldehyde (Hea 02: indoor air quality)	limit of quantification $\leq 0.01 \text{ mg/m}^3$ (excellent quality) below the limit of quantification, see test report
VOC content (Hea 02: indoor air quality)	not present
VOC emissions (Hea 02: indoor air quality)	limit of quantification $\leq 0.3 \text{ mg/m}^3$ (excellent quality) below the limit of quantification, see test report
SVOC emissions (Hea 02: indoor air quality)	limit of quantification $\leq 0.1 \text{ mg/m}^3$ (excellent quality) below the limit of quantification, see test report
CMR substances (Hea 02: indoor air quality)	limit of quantification $\leq 0.001 \text{ mg/m}^3$ (excellent quality) below the limit of quantification, see test report
Eco-labels and environmental labels	
Certificates, eco-label, environmental label	 <p>TÜV SÜD - testing for health-relevant ingredients and emissions, regular product and process monitoring, inspection of input materials (www.tuvsud.com/schadstoffpruefung-bauprodukte) TÜV SÜD - Certificate/eco-label no. TM-22/260126-1</p> <p>FSC®-Mix (FSC-C171317) - The product is made from FSC®-certified material</p> <p>FSC®-Mix (FSC-C204038) - The product is made from FSC®-certified material</p>

Sustainability Data Sheet

StoTap Evo

Environmental Product Declaration (EPD)	None
GISCODE (in accordance with GISBAU)	not known
Safety Data Sheet (SDS)	available
Technical Data Sheet (TDS)	available
Product ingredients	
Composition	not collected (scope 3)
Organic component (in accordance with natureplus, baubook)	> 5 %
Hazardous substances (in accordance with EU regulations)	See Safety Data Sheet (section 3)
CMR substances (VOC)	contains titanium(IV) oxide (not in powder-form)
VOC content (in accordance with Directive 2004/42/CE)	not subject to the guideline
Plasticiser	plasticiser-free (materials in accordance with VdL guideline 01), (according to measurement)
Free formaldehyde	≤ 10 mg/kg (see test report)
Biocide(s), active substance(s) for protection of the coating (in accordance with Regulation (EU) No 528/2012)	not present
Biocide(s), active substance(s) for protection of the product during storage (in accordance with Regulation (EU) No 528/2012)	not present
Heavy metals	below limiting value(< 1 mg/kg, per heavy metal) (migration in accordance with EN 71-3)

Sustainability Data Sheet

StoTap Evo

Compliance with the emissions restrictions of the titanium dioxide industry (in accordance with Directive 2010/75/EU and 25th Ordinance for the Implementation of the Federal Immission Control Act)	yes
SVHC in accordance with the chemicals regulation REACH (EG/1907/2006), notes XIV	not present
Emissions, CO2 balance sheet	
Carbon dioxide value (manufacturing A1-A3) (cradle-to-gate)	not determined
Carbon dioxide value (life cycle A1-D)	not determined
Semi-volatile organic compounds SVOCs	≤ 0.01 mg/m ³ (see test report)
Disposal, re-use, recycling	
Disposal of residue	correctly sorted, clean material can be recycled see Safety Data Sheet (section 13)
Disposal of dismantled building material	can be reworked
Packaging, pails, films	The return of used packaging and its correct recycling is organised and certified in accordance with the statutory requirements with a regional disposal company.
Sto corporate responsibility	
Guiding principles, management of the company	Sto's vision is to be the technology leader in the sustainable design of living space tailored to human needs. Worldwide. For further information please visit: www.sto.com
UN Global Compact - membership	Sto is a member of the UN Global Compact and is committed to upholding ten universally acknowledged principles taken from the areas of human rights, labour standards, environmental protection, and anti-corruption. For further information please visit: www.unglobalcompact.org

Sustainability Data Sheet

StoTap Evo

ILO fundamental conventions

Sto has committed itself to adhering to the ILO fundamental conventions at all of its locations.

Quality management, environmental management, energy management

Production location certified in accordance with DIN EN 9001, DIN EN 14001, and DIN EN 50001.

Supplier code of conduct

The Sto Supplier Code of Conduct is based on the principles of the UN Global Compact and the Sto Guiding Principles. Suppliers must adhere to these and are continuously evaluated.

This document aims to help you better assess the sustainability of our products. We consider sustainability to be a complex process that involves bringing together economic, ecological, and social criteria in order to satisfy the needs of current and future generations. Our products aim to contribute to this, while also meeting the requirements placed on them with respect to well-being, quality, and functionality. We regard sustainability as a process of continuous improvement, not one with an end result. With this in mind, we have defined the following core statements for our products:

1. Sto products make a contribution to key aspects of sustainability: e.g. climate protection, building, energy, and resource efficiency, protection and durability, health, and well-being.
2. All of the raw materials used in Sto products fulfil the functions for their application and are optimised with respect to their impact on the environment - based on the latest technology.
3. Sto products are produced in an energy and resource-efficient manner; renewable raw materials are used when appropriate and acceptable from an ecological, economical, and social perspective.
4. Sto evaluates and promotes the potential to dispose of, reuse, and recycle its products, taking technological and economical feasibility into account.

It is not just down to us to determine how the sustainability of our products is interpreted and evaluated - your opinions and decisions also play a role. The information listed here, which has the environment and health as its main focus, aims to assist you in this regard.

The information and data contained in this sustainability data sheet is based on our knowledge and experience. The publication of a new sustainability data sheet invalidates all previous versions. Please observe the information in the Technical Data Sheet and Safety Data Sheet. The latest version is available on the Internet.
